INTRODUCTION

The HEGEL journal brings together stakeholders in integrative health to encourage meaningful dialogue across society and foster a better understanding of the challenges of CURE and CARE, in support of a sustainable approach to whole-person health.

EDITORIAL MODEL & OPERATION

The HEGEL journal adopted a nonprofit**, volonteer-led, participatory and multidisciplinary publishing model, bringing together researchers, doctors, pharmacists and healthcare professionals.** This model **underpins a shared editorial resource: independent, free for authors** and accessible across disciplinary and professional boundaries.

ACHIEVEMENTS AND IMPACT

In the complex and evolving field of integrative health, HEGEL has positioned itself at the intersection of multiple disciplines.

Oncology, general medicine, hypnosis, dentistry, aromatherapy, horticultural therapy, naturopathy, art therapy, reflexology, meditation…

History, philosophy, anthropology and health economics

Environmental and Ethical issues.

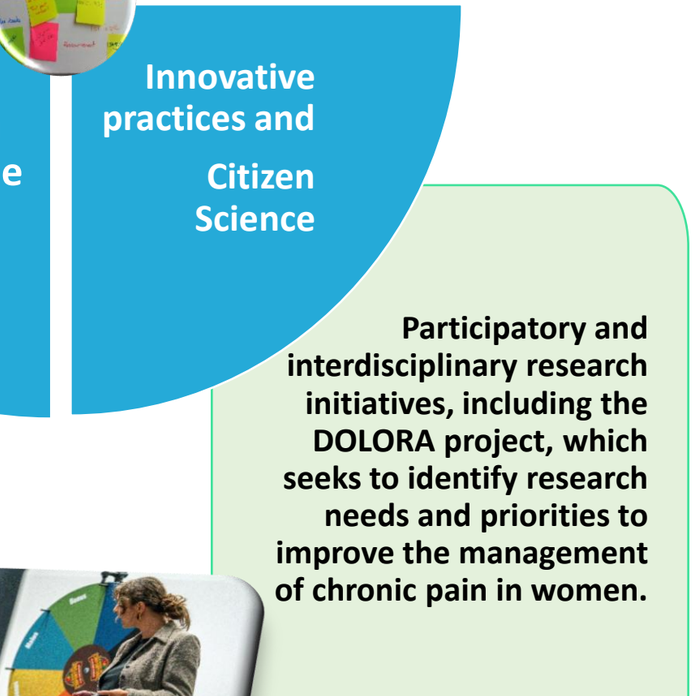

Work and Health, Art and health, Sport and health, Nutrition

Individual determinants: behavioral, biological, genetic, etc.

Participatory and interdisciplinary research initiatives, including the DOLORA project, which seeks to identify research needs and priorities to improve the management of chronic pain in women.

This vitality was reflected in the first **HEGEL Conference**, “Integrative Health: Let’s Talk About It!”, held in Aubagne–Marseille on May 23, 2026. Free and open to the public, the event brought together more than 150 participants for roundtable discussions, testimony from a patient expert, poster presentations, exhibitions and artistic creations arising from participatory research.
