Geneva Health Forum

Shared, Ready-to-Move-In Laboratories: A New Model for Collaboration in Global Health Innovation

Ezgi Yagmur Kala Kalkan[1], Alexandra Martiné[1], Xi Zhang[1] · [1] Superlab Suisse Geneva SA, Campus Biotech, Geneva, Switzerland

4+2 locations
Lausanne, Basel, Zurich, Geneva, Shanghai, Beijing

70+ members
companies and partners we host

400+ scientists
served across our sites

1.2B CHF raised
collectively by our community

≤50% savings
on consumables, equipment, services

All-In-One Solution for Science Companies

All a science company needs, delivered in one membership.

Private Labs & Offices
Fully serviced, IP-free BSL1&2 labs, private offices

Shared Facilities & Equipment
Cell culture room, freezer, autoclave, storage

Vendor Discounts
Discounts on equipment & consumables

BD Support
Company creation, entrepreneurship support

Lab Services
Comprehensive lab management services

Technology Platform
Animal facilities, imaging centres and more

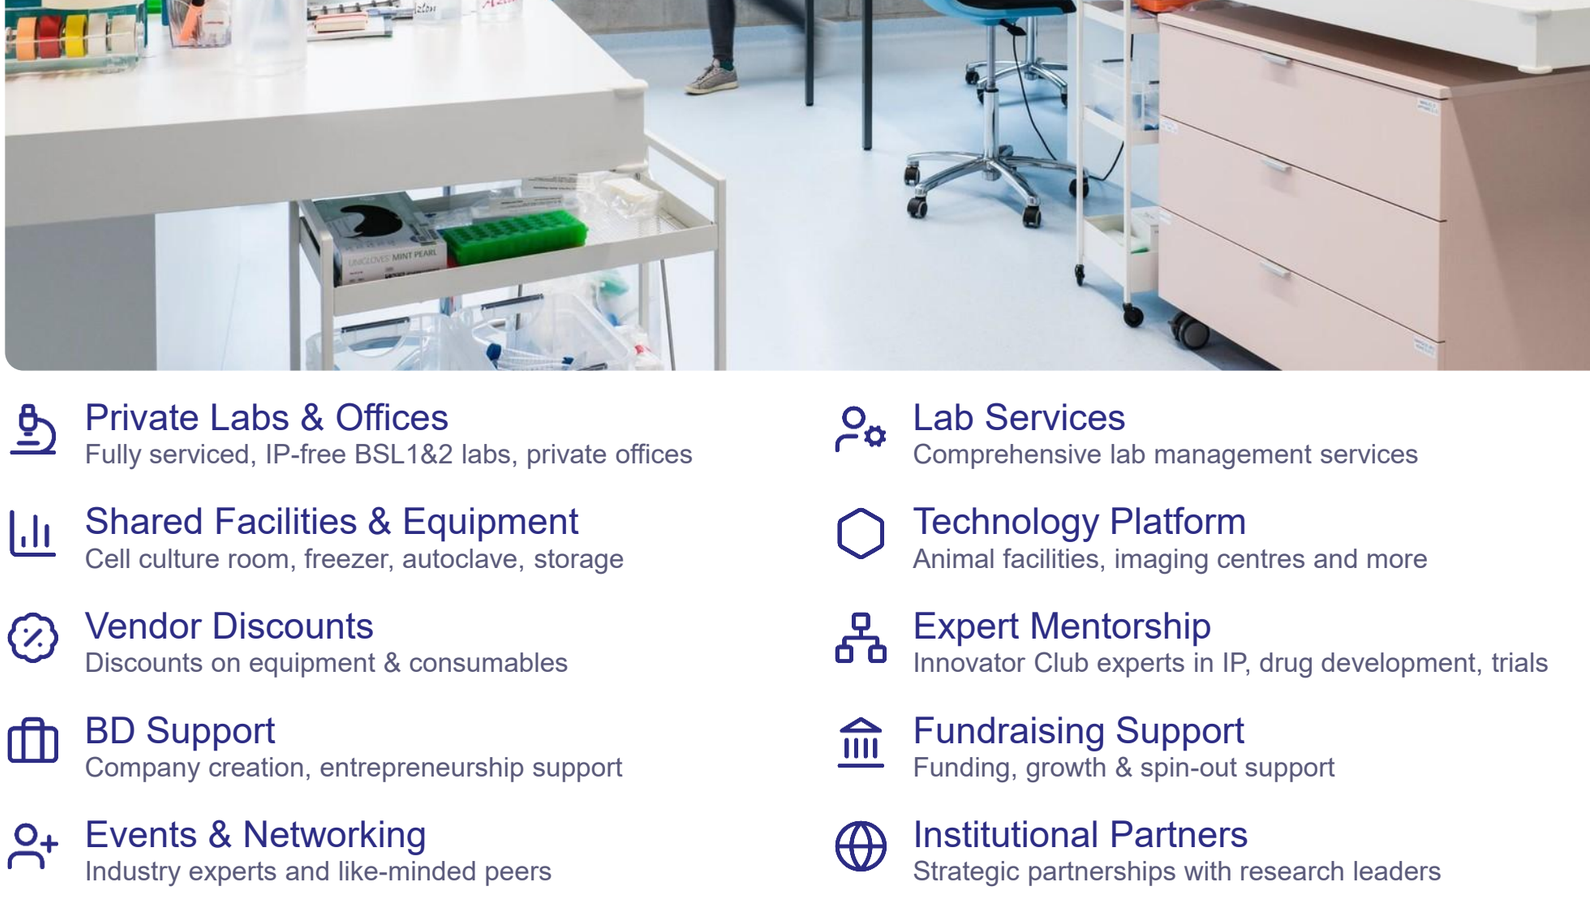

Expert Mentorship
Innovator Club experts in IP, drug development, trials

Fundraising Support
Funding, growth & spin-out support

Events & Networking
Industry experts and like-minded peers

Institutional Partners
Strategic partnerships with research leaders

The same standard and services, wherever you set up

01 Introduction

Collaboration across academia, industry and start-ups drives global health innovation. Yet a compliant wet-lab can take **considerable capital** and **a year or more** to open.

Ready-to-move-in labs with operational support, vendor access and growth connections for life science companies, from start-ups and scale-ups to corporates and institutions.

02 Methodology

A global operating system for science: company set-up, lab and office space, lab operations, business development and funding in one membership, valid across every Superlab location.

Radically fast to move in

1. **Book a lab**
2. **Submit your equipment**
3. **Receive your lab layout**
4. **Move in**

03 Results and Discussion

Compliant lab space **in days, not years**, OpEx instead of CapEx, saving **2+ FTEs and millions in cost**. **70+ members and partners** and CHF 1.2B raised by our community. At Campus Biotech, next to EPFL, UNIGE, HUG, HEPIA and the Wyss Center.

04 Conclusions

The science platform built for growth: we lower the barriers to building and scaling life sciences companies, turning research into real-world health impact.

Join our ecosystem. Let's connect.
